

Hamza Mohamed Ahmed

Frontend Developer React

+201124475468 | hm32295@gmail.com | linkedin.com/in/hamza-mohamed-3015a2293 | github.com/hm32295

El-Fayoum (Available to Relocate)

SUMMARY

Experienced frontend developer skilled in building responsive, high-performance web applications. Expertise in performance optimization and modern frameworks such as Next.js, React, HTML, CSS, JavaScript, and TypeScript. Passionate about continuous learning and emerging web technologies.

INTERNSHIPS

Upskilling JSB bootcamp

May 2025 - Aug 2025

- Actively participated in an Upskilling program, simulating real-world work environments and tackling industry-relevant challenges through hands-on web development projects, gaining practical skills for excelling in real-world scenarios.

PROJECTS

Quiz Management System :- [Live - Files]

- User management roles (Instructor / Student)
- Instructor Tools: Allows instructors to create and manage exams, monitor student performance, and adjust exam settings
- Robust Admin Control: Manage rooms, bookings, and customer data efficiently
- Student Portal: Provides students with access to exams using unique codes, allowing them to take exams, view results, and access exam history
- Interactive Exam Management: Enables efficient communication between instructors and students for seamless exam administration and participation

Hotel Management System :- [Live - Files]

- User management roles (Admin / User / Visitor)
- Room Management: Add, edit, and organize room details including availability, pricing, and images.
- Booking System: Manage reservations, track check-ins/check-outs, and view real-time room status.
- Dashboard Analytics: Display booking statistics and revenue insights for better decision-making.
- Authentication: Secure login system with JWT-based authorization.
- Responsive Design: Built with React, MUI, and TypeScript for a modern and seamless user experience.

Hotel Management System :- [Live - Files]

- User management roles (Admin / Employee)
- Task Management: Create, edit, and assign tasks to specific users with deadlines and priorities.
- User Roles: Define different access levels (Admin, Employee) for better control.
- Progress Tracking: Visual progress indicators and status updates for each project..
- Team Collaboration: Real-time communication and notifications for team members.
- Authentication System: Secure login and role-based access control using JWT.
- Responsive & Modern UI: Built with React, MUI, and TypeScript for a smooth user experience.
